The Right Person:

Gone are days when a person working in this industry was judged by their size and fighting abilities, now many other attributes are looked for. You will need to be prepared to work away from home for days, weeks or even months and ready to accept the challenges of this industry that are rarely glamorous, as portrayed by some, but can be mentally tiring and sometimes physically dangerous. If you can deal with this, once trained by us, then we may be able to use you in this industry. Are you cool headed, collective, of any easy going personality, able to remain calm when the going gets tough and posses the ability to remain flexible in your approach to things, you should also have lots of common sense, be honest, punctual, reliable and trustworthy to yourself and your employers.

Other Opportunities:

On successful completion of the Close Protection course and gaining employment, the close protection industry you will find has a lot to offer the right kind of individuals from work to training. Once you have completed your apprenticeship then the ultimate work and pay comes from our operational primary teams, from our ourselves, group members and associates, who all select C. P.O. s from our institute and society membership. Should you want more training knowledge, whether nationally or internationally, then all you need to do is contact us by post and we will send you some of the relevant documentation.

(ONLY AFTER COMPLETION OF THE COURSE AND YOUR SIA LICENSE HAS BEEN GRANTED.)
